

# ACTUARTECH

For Actuaries.

Technological advances are disrupting traditional practices within the actuarial and insurance world. This creates exciting opportunities for actuaries and insurers. Actuaritech helps actuaries make sense of the impact that these technological advances will have on our roles and our organisations. We have created a platform that is **the home of actuarial technology**.

- 01 | Website featuring interviews, blog posts, podcasts and articles
- 02 | Covering a range of technology trends
- 03 | Featuring Actuarial software and educational information and materials
- 04 | Online toolkit to help actuaries and actuarial functions to continue to play a significant role in our profession and our organisations
- 05 | To access our platform, go to [www.actuaritech.com](http://www.actuaritech.com) and sign up to our Newsletter today

We have a large library of training courses, research articles and reference material available including...

The basics of  
actuarial  
technology

Data Science for  
Actuaries

Explaining  
Robotics Process  
Automation

The future of
